

Gerardo Ramos

Senior Software Engineer · Full-Stack / Front-End · Angular, Vue.js, Node.js, Laravel · Remote on U.S. hours

San Salvador, El Salvador · [linkedin.com/in/gerardoramosdev](https://www.linkedin.com/in/gerardoramosdev) · geratobe@gmail.com · gerardoramos.dev

Senior full-stack engineer with nearly 6 years building web applications for U.S. and LATAM companies, working remotely with U.S. clients since 2021. Angular (v12 through v22, signals and SSR) and Vue.js specialist, with back ends in Node.js, Laravel and Next.js. As a team lead I ran a team of 4 developers across 4 projects. I use AI daily (Claude Code, MCP, Cursor) and review every change.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, PHP, C#, Dart, SQL, HTML, CSS

Frontend: Angular (v12-v22, signals, SSR), NgRx, RxJS, React, Vue.js, Tailwind CSS, Bootstrap, Three.js

Backend & mobile: Node.js, Express, Next.js, Laravel, .NET Core, REST APIs · Flutter, Ionic, SwiftUI

Data, cloud & DevOps: PostgreSQL, MongoDB, Supabase, AWS, Docker, GitHub Actions

Quality: Unit and end-to-end testing (Jest, Vitest, Cypress), 90% coverage, performance and SEO, WCAG AA

AI: Claude Code, Claude + MCP, Playwright (AI testing), GitHub Copilot, Cursor, OpenCode, n8n

PROFESSIONAL EXPERIENCE

Freelance

United States (remote)

Senior Full Stack Engineer

May 2023 – Present

- Full time with a long-term U.S. client; 4 clients since 2023. Production apps in Angular and Vue.js (NgRx) on Laravel and Next.js.
- Improved performance, load times and SEO, and migrated projects to current technologies.
- Unit and end-to-end testing: brought critical components to 90% coverage, reducing regressions.
- AI delivery workflow (Claude + MCP, Copilot, Cursor): less boilerplate, every change reviewed.

Vertikal Company

San Salvador, El Salvador

Team Lead

January 2022 – March 2023

- Led a team of 4 front-end developers and owned 4 custom client projects in Angular and Node.js.
- Set best practices, ran code review and mentored the team; delivered on time for every client.
- Migrated projects to current tech; improved performance, load times and SEO, with unit and e2e tests.
- Designed scalable, sustainable front-end architectures on AWS, with MongoDB and PostgreSQL.
- Introduced Ionic to ship web and mobile from one codebase, reducing separate mobile build effort.

Full Stack Engineer

May 2021 – January 2022

- Built custom web applications end to end with Angular and Node.js, with clean code and tests.

PGS360

United States (remote)

Front End Developer · part-time contract (weekends)

May 2021 – January 2023

- Front-end support in Angular 14, Node 18 and Bootstrap: responsive UIs that streamlined processes.

Touch Technologies S.A. de C.V.

San Salvador, El Salvador

Front End Developer

March 2021 – May 2021

- Built in-house Flutter mobile apps for business management.

PROJECTS

Miaow Bag: online store with a 3D design studio

miaowbag.site

- Production e-commerce (Angular, Three.js, Supabase): customers design a tote or mug and preview it in 3D.
- Secure guest checkout (RLS, Turnstile), admin panel and in-browser AI image upscaling.

El cuarto: interactive portfolio

gerardoramos.dev

- 3D portfolio in Angular 22 (signals, SSR) and Three.js, bilingual and WCAG AA; this CV uses the same data.

EDUCATION

Universidad Dr. Andrés Bello

San Salvador, El Salvador

B.S. in Computer Software Engineering

2017 – 2021

Certifications: Angular · Node.js REST APIs with Express.js · Asynchronous JavaScript · Flutter · Advanced Flutter
